

ENCYCLOPEDIA OF REPRODUCTION

Editor-in-Chief: Michael Skinner

eBook ISBN:9780128151457

Book ISBN:9780128118993

Imprint: Academic Press

Published Date: 27th July 2018

Description

Encyclopedia of Reproduction, Second Edition comprehensively reviews biology and abnormalities, also covering the most common diseases in humans, such as prostate and breast cancer, as well as normal developmental biology, including embryogenesis, gestation, birth and puberty. Each article provides a comprehensive overview of the selected topic to inform a broad spectrum of readers, from advanced undergraduate students, to research professionals. Chapters also explore the latest advances in cloning, stem cells, endocrinology, clinical reproductive medicine and genomics.

As reproductive health is a fundamental component of an individual's overall health status and a central determinant of quality of life, this book provides the most extensive and authoritative reference within the field.

Key Features

- Provides a one-stop shop for information on reproduction that is not available elsewhere
- Includes extensive coverage of the full range of topics, from basic, to clinical considerations, including evolutionary advances in molecular, cellular, developmental and clinical sciences

- Includes multimedia and interactive teaching tools, such as downloadable PowerPoint slides, video content and interactive elements, such as the Virtual Microscope

Readership

Students as well as clinicians, researchers and professionals in the field of reproductive medicine seeking specific information on topics outside of their immediate area of expertise. Laboratories, pharmaceutical companies, and graduate, departmental and medical school libraries

Table of Contents

Volume I: Male Reproduction

Edited by Bernard Jégou and Michael Skinner

Testis

Testis Cell Biology

Development

Testis Physiology

Male Endocrinology

Male Reproductive Tract

Male Reproductive Physiology

Comparative Mammalian Male Reproduction

Environmental Toxicology

Volume II: Female Reproduction

Edited by Tom Spencer and Jodi Flaws

Ovary

Ovary Development

Female Endocrinology

Female Reproductive Physiology

Female Reproductive Tract

Early Pregnancy and Implantation

Pregnancy

Comparative Mammalian Female Reproduction

Environment and Toxicology

Mammary Gland

Volume III: Gametogenesis, Fertilization and Early Development

Edited by John McCarrey and Wei Yan

Gametogenesis

Spermatogenesis

Oogenesis

Sexual Development

Fertilization

Embryogenesis

Fetal Development

Germline Epigenetic Inheritance

Environmental Impacts on Gametogenesis and Embryogenesis

Volume IVa: Reproductive Medicine Female

Edited by Carlos Simon Valles and Craig Niederberger

Evaluation Female Fertility

Medical Conditions
Family Planning
Oncofertility
Treatment: Medical
Treatment: Medical
Mental health, ethics and the law

Volume IVb: Reproductive Medicine Male

Edited by Carlos Simon Valles and Craig Niederberger

Evaluation
Environment
Genetics
Medical Conditions
Treatment: Medical
Treatment: Surgical
Mental health, ethics and the law
Male Reproductive Cancer and Disease

Volume V: Reproductive Medicine Assisted Reproduction

Edited by Carlos Simon Valles and Craig Niederberger

Technical Processes
Technologies
Semen analysis
IVF Laboratory
Embryology
Genetics and Epigenetics
Cryobiology
Clinical Strategies
Special Medical Conditions
Complications
Prenatal Screening
Clinical Follow-up
Economics
The Support Team
Ethics and the Legislation
Future

Volume VI: Comparative Reproduction

Edited by Penny Swanson and Michael Skinner

Introduction
Modes of Reproduction
Behavior
Development and anatomy of reproductive organs
Primordial germ cells, Sex Determination and Differentiation
Gamete Structure
Oogenesis and Ovulation
Maternal Reserves
Spermatogenesis and Spermiogenesis
Fertilization
Endocrine Control of Reproduction
Seasonal Reproduction
Puberty and Metamorphosis related to reproduction

Pregnancy and Parturition
Olfaction and Reproduction
Reproduction, Overview by Phylogeny
Reproduction, Exotics/Zoo Animals/Wildlife
Reproduction General, Lab Animals
Genetics and Epigenetics in Life History and Reproduction
Energetics/Nutrition in Reproduction
Reproductive Technology (non-human/non primate)
