ISBN-10: 1841846805

ISBN-13: 978-1841846804

Product Dimensions: 25.7 x 19.3 x 3.6 cm

A major new international reference work on andrology from the EAU Section of Andrological Urology – covering such issues as male infertility, erectile dysfunction, late-onset hypogonadism, and reproductive cancers – that engages with contemporary concern for evidence based practice, minimizing interventions, and promoting male reproductive health.

Interest in andrology is rapidly growing with issues such as male infertility, erectile dysfunction, late-onset hypogonadism and reproductive cancers getting more and more attention. This is a trend that will continue to grow with the demographics of an ageing population. This book will be based around courses run by the European Academy of Andrology – a collaboration between three European societies: EAU (urology), EFES (endocrinology) and

ESHRE (reproductive medicine). It reflects the modern trends of evidence based practice, minimizing interventions, and promoting male reproductive health. The book is comprehensive in scope and written by a team of well respected European opinion leaders.
